August Newsletter

Message from Supervisor Jon Kaiman

The OIC is an example of how local government works better when it forms partnerships with one another. This electronic newsletter will serve as the next step in the Town of North Hempstead's continuing effort to help all the municipal entities that lie within our township work effectively and efficiently with each other to best serve our residents' needs.

Update

North Hempstead's Office of Intermunicipal Coordination (OIC) has been very busy lately! From working with various Villages in Great Neck in cleaning up after the June 24th storm to working on ways to improve efficiencies in our Ambulance Service (which is rated as one of the best in the nation) to streamlining services with Villages, Special Districts, School Districts and others resulting in cost savings to our mutual taxpayers. The OIC is here to help you in any way we can.

We encourage you to visit our website listed above so you may discover for yourself what the OIC can do for you.

You may also email or call Rafe Lieber, Director of the OIC at lieberr@northhempsteadny.gov or 516-869-7720. Thank you...

Reminder to Special Districts

If you have not scheduled your budget meeting with the Town, please do so as soon as possible. You may contact Rafe Lieber by email or phone to set up your appointment.

Also, please let Mr. Lieber know the date, time and location of your public budget meeting.

We very much appreciate your cooperation. Thank you...

Testimonials

Town cleanup crews in the Village of Great Neck after the 6/24 storm

"We have been working with the Town's Office of Intermunicipal Coordination on a number of issues including sign development, repair and replacement and it has been an invaluable resource to my Village. We have improved efficiency and saved taxpayer dollars. Entering into a general Intermunicipal Agreement with North Hempstead was one of the best decisions the Plandome Heights Board of Trustees has made. We intend to continue to work through this arrangement to improve efficiency and save costs."
